

CloudLibrary – Language Search

How to Search by Language in CloudLibrary

The **CloudLibrary** app allows you to download e-books and e-audiobooks for free through the library. We have books in many languages available.

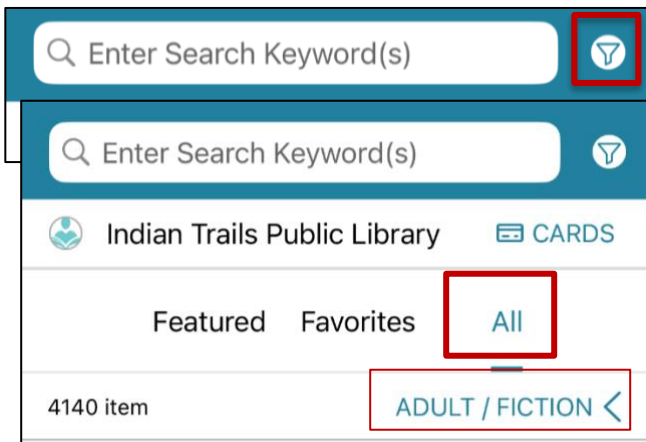

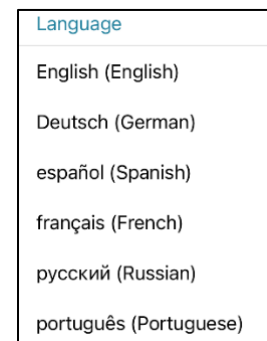

On a Phone or Tablet:

1. Once you have CloudLibrary downloaded and you are logged in, locate the

“Search” button on the bottom of the screen.

2. Find the “Filter” icon in the top right corner of the screen, next to the search bar.
3. Select the language or languages you’d like to read in.

4. Close the “Filters” tab and return to the “Search” page. Select “All.” You can now browse all titles in your specified language by genre.

Note: The default is Adult Fiction, but you can click on that to change the age / type of books.

From a Computer:

1. Once logged into your CloudLibrary account, locate the search bar and click on the triangle to expand the search bar.

CloudLibrary – Language Search

2. Select “Advanced Search.”
3. On the top right side of the screen, find the Language dropdown. Open it and select the language you would like to see.

4. On the left side of the screen, you will see many options to narrow your search. You can enter specifics there OR leave them empty and click “Search” to see all books in your specified language.
