

Sublimation Printing and Heat Press onto a Mug

Visual: A mug with the Chicago skyline printed on it is being spun around.

Text: Let's make this with the sublimation printer and mug press!

Visual: The Chicago Skyline image is dropped into the sublimation printer software to prepare for printing. A Print Manager pop-up window allows for more adjustments.

Visual: Cut to the Sublimation printer printing the skyline.

Visual: Cut to the skyline being taped onto the mug using heat resistant tape.

Text: Heat resistant tape.

Visual: The mug is inserted into the heat press and a lever is pressed down to lock it into place.

Text: The mug press will heat the photo onto the mug.

Visual: The heat press takes about 4 minutes.

Visual: The skyline paper is being taken off the mug to reveal the sublimated image.

Text: Chicago!
